

AQUA-AEROBIC SYSTEMS, INC.  
A Metawater Company

## Rental Filters: An Economical Option for Your Short-Term Needs with No Long-Term Commitment

Aqua-Aerobic offers rental filters with significant savings over the purchase of a new filter. The filters are an ideal solution when plant upset occurs, when existing filters need to be rebuilt, or to confirm that cloth media technology is suited for your application.

### Features and Advantages

- Available in nominal 2.5, 5 or 10 micron media
- Suitable for indoor or outdoor applications
- Filters are automatically controlled via PLC
- Quick shipment with ease of installation
- Technicians available to assist with start-up
- Optional bench-scale testing prior to rental

Internal components are assembled from 304 SS

### Applications

- Industrial and Municipal Applications
  - Total Suspended Solids Removal
  - Phosphorus Removal
  - Reuse/Recycle
  - Side Stream Filtration
  - Primary or Tertiary Treatment
  - Turbidity Removal

Units ship fully-assembled and ready for operation

### Available Filters:

- Aqua MiniDisk® (0.5 MGD avg – 1.0 MGD max)
- 6 Disk Model 54 (1.5 MGD avg – 3.0 MGD max)
- 8 Disk Model 54 (2.0 MGD avg – 4.0 MGD max)
- 12 Disk Model 54 (3.0 MGD avg – 6.0 MGD max)
